Mobile Engineer | iOS

Mobile engineer with hands-on experience across restaurant booking, banking and insurance apps. I currently work in the Platform team at TheFork (Tripadvisor group), on app architecture, platform upgrades and developer tooling alongside feature work. Before that I owned key domains of a large insurance product, working with business stakeholders from requirements to production releases. In love with Clean Code, SOLID principles and pragmatic quality practices. Comfortable mentoring junior developers and partnering with cross-functional teams to hit product goals.

Core skills

Swift | SwiftUI | UIKit | Swift Concurrency | Combine | Modular architecture (SPM) | MVVM | SOLID | Dependency Injection | Fastlane | CI/CD | Firebase | Datadog | Git | REST & GraphQL APIs

Experience

Apr 2026 – Present **TheFork (Tripadvisor group) — Mobile Engineer II, iOS (Platform team)**

- Work on the architecture of the TheFork iOS app: navigation, app lifecycle and modularization.
- Take care of iOS and Xcode upgrades, keeping the app aligned with the latest platform releases.
- Maintain the team's developer tooling: SwiftLint, SwiftFormat and GitHub Actions.

Apr 2023 – Apr 2026 **Iriscube Reply — Consultant Mid iOS Engineer (Insurance Platforms)**

- iOS developer on a large insurance app, acting as a reference point for the teams and coordinating work on high-impact areas of the product.
- Partnered with business stakeholders to review requirements for core user flows, sketch the technical approach, and deliver solutions end-to-end.
- Managed builds, configuration, and CI/CD all the way to production deployments.
- Mentored junior developers via code reviews, task breakdown, and practical guidance on iOS best practices.

Jun 2022 – Nov 2023 **Iriscube Reply — Consultant, iOS Customer Service (Isybank & Intesa Sanpaolo)**

- Contributed to both architecture and features of the Customer Service area in the new Isybank app.
- Integrated chatbot and screen-sharing SDKs to support in-app assistance and improve the customer support experience.
- Maintained and evolved the corresponding Customer Service sections in the Intesa Sanpaolo app, ensuring stability and alignment with new releases.

Mar 2022 – May 2022 **Enhancers S.p.A. — Thesis Intern**

- Developed features for an IoT-connected oven and the “hOn” smart home app using React Native and TypeScript, improving the user experience.
- Worked in an agile team, contributing to code reviews, testing, and maintenance of existing features.

Learning

Concurrency Course - SwiftLee — Sep 2025 – Jan 2026

- Focus on modern Swift concurrency (Swift 6), including async/await, structured concurrency, and actors.

Essential Developer Academy - Caio and Mike — Blue Belt Program | Sep 2023 – Aug 2024

- System design with SOLID and Clean Architecture, testable networking and persistence, modularization, dependency injection and Swift Concurrency, with code reviews and mentoring from senior engineers.

2019–2022 **Master’s Degree in Computer Engineering** Politecnico di Torino — 110/110 with honors

Thesis: “Guided Cooking: improving everyday interaction with a connected oven.” Thesis carried out at Enhancers, Turin.

2016–2019 **Bachelor’s Degree in Computer and Automation Engineering** UNIVPM — 107/110

Thesis: “Design and implementation of an Android app and a back-end system for managing orders in a restaurant.”
